The Nature of Bulk Material Handling

Pneumatic Conveying Solutions

A full service partner focused on delivering quality

Pelletron has expanded its services to provide plastic manufacturers and compounders with a full range of solutions, including turnkey pneumatic conveying systems and a full line of conveying components. Pelletron also offers a complete series of in-line and off-line DeDusting systems for the removal of dust and streamers.

The Nature of Bulk Material Handling

Research & Development

Pelletron developed unique pneumatic conveying technologies, such as the FlowEnhancer[™], system components such as rotary and diverter valves and revolutionary pipe elbows, called Pellbows[®]. The XP-series DeDuster[®] and the CCD Compact Cyclonic DeDuster[®] represent outstanding new technologies.

Pelletron Test Facilities

Pelletron maintains a test lab to perform pneumatic conveying trials for dilute phase, STRANDPHASE[™] and dense phase conveying, product cleaning tests with various sizes of DeDusters[®], and Toll cleaning services for our customers.

Technologies

- Dilute phase conveying systems
- STRANDPHASE[™] conveying systems
- Dense phase conveying systems
- DeDusting Solutions

Services

- System design/engineering
- System analysis & optimization
- Project management
- Instrumentation & controls
- Installation
- Field service
- Global sourcing
- Commissioning
- Pneumatic conveying and DeDusting tests
- Toll cleaning
- Spare parts & re-furbishing

Applications

- Railcar loading and unloading systems
- Pneumatic transfer systems
- Bagging stations
- Truck loading and unloading systems
- Big bag filling stations
- Extruder feeding

DILUTE PHASE CONVEYING

STRANDPHASE[™] CONVEYING

DENSE PHASE CONVEYING
